

Pineapple Surprise

A fun little 3D card using Sizzix Pineapple Fold-a-long Die set. Sure to please the recipient and you can use the message that comes with the set or hide your own statement inside!

Cut a 12 x 12 sheet of yellow cardstock in half. Then fold that piece in half. Place the die with the side indicating the fold line on the folded edge of the cardstock as shown. Run through your Big Shot or other die cutting machine.

This is what the cut piece should look like when cut and unfolded.

Cut another one out of decorative paper. Trim as shown to create pieces to embellish card.

Adhere decorative pieces as shown using Zig two way glue. Cut dark green pineapple topper pieces the same way and trim to add to the card.

Die cut message, panel and elements and adhere as shown on inside of card.
